
INTELLIGENCE ATLAS™

Dress Me Intelligence™

The outfit engine that reasons about your life.

PUBLISHED / ACTIVE

PURPOSE

Dress Me Intelligence™ is EVERYNN's core outfit generation engine. It transforms contextual inputs — occasion, weather, mood, fit profile, closet inventory — into complete, reasoned outfit recommendations. Every recommendation is explained, attributed to real signals, and traceable to the member's declared identity.

INPUTS

- Occasion context (work, event, travel, casual, evening)
 - Weather and environmental conditions
 - Member fit profile and size preferences
 - Closet Intelligence™ inventory data
 - Personal Style Intelligence™ identity signals
 - Body profile parameters (fit preference, silhouette)
 - Anti-repeat and wear-history signals from Memory Intelligence™
-

OUTPUTS

- Complete outfit recommendation (top, bottom, shoes, accessories)
 - Confidence score with reasoning attribution
 - Why This Works™ narrative explanation
 - Backup look with alternate direction
 - Occasion-appropriate styling notes
 - Shop links for missing or complementary items
-

TRUST MODEL

Every Dress Me recommendation is traceable. The system declares which signals were used, which were absent, and what confidence level the outcome carries. No recommendation is presented without a stated rationale. Members can interrogate any result through the Why This Works™ panel. The system never fabricates signal data.

EXPLAINABILITY MODEL

Dress Me Intelligence™ operates under EVERYNN's Full Provenance Standard. Every output is accompanied by a plain-language explanation that names the signals used, the occasion context applied, and the confidence level assigned. The Backup Look carries its own independent rationale.

All reasoning is surfaced to the member — none is hidden in the model layer.

MEMBER VALUE

Members receive outfit decisions they can trust, not just outfit suggestions they must evaluate. Dress Me Intelligence™ eliminates decision fatigue by producing complete, contextualized recommendations grounded in the member's declared identity. Every look is explained, every choice is traceable, and every session builds the system's understanding of the member's style.

"A recommendation without a reason is a guess. Dress Me Intelligence™ does not guess."
